

International peer-reviewed open access journal in Byzantine Studies

Taking into consideration the latest developments in scientific publishing, the Institute for Byzantine Research of the National Hellenic Research Foundation has reevaluated the aims of *SYMMEIKTA*, a journal it has published since 1966. Under the new name *BYZANTINA SYMMEIKTA*, it has become a peer-reviewed open access journal with well-defined processes and scope and it is freely accessible at: www.byzsym.org. It's printed version will be published at the end of each year.

By visiting the journal's website, academics and researchers in the field of Byzantine Studies can, from now on, submit articles and book reviews.

BYZANTINA SYMMEIKTA publishes original articles and book reviews in Greek, English, French, German and Italian. *BYZANTINA SYMMEIKTA* I does not require authors to waive their copyright over their articles.

With an International Editorial Advisory Board, the rigorous publication procedures and the immediate publication of reviewed and edited articles, as its main assets, *BYZANTINA SYMMEIKTA* is committed to maintaining high standards in publications while taking advantage of the possibilities offered by the new technologies.

BYZANTINA SYMMEIKTA utilizes the Open Journal Systems (OJS) as its online publication management system. OJS is an open-source platform, and one of the most frequently used journal management and publishing systems in the world. The platform was customized by the National Documentation Centre in order to fully meet the special characteristics and publishing procedures of an electronic journal. Based on the University of Patras' Greek translation of the platform, the National Documentation Centre adapted into Greek many commands and system messages necessary for the operation of scientific peer-reviewed electronic journals.

The open access peer-reviewed journal *BYZANTINA SYMMEIKTA* is part of the project "National Information System for Research and Technology, Phase III – Open Access Electronic Repositories and Journals" which is being developed by the National Documentation Centre under the framework "Digital Greece" (www.psifiakiellada.gr) and is 80% co-financed by the European Union - European Regional Development Fund and 20% by the Greek Public Domain (Operational Program for IS - OPIS, 3rd CSF 2000-2006).

For further information visit the journal's website: www.byzsym.org or send an email to: byzsyminfo@eie.gr
