

**THOMAS MAVROMOUSTAKOS**  
**Capodistrian University of Athens**  
**Associate Professor of Chemistry Department**

**Date of birth: 18/6/1960**

**Address:** National Capodistrian University of Athens, Chemistry Department,  
Panepistimioupolis Zographou 15771

**Tel:** +30 2107274293

**FAX:** +30 2107274293

**e-mail:** tmavro@eie.gr

**Family status:** Married with four children

## **EDUCATION**

**B.Sc.** 1985 Chemistry, University of Athens, Greece.

**M.Sc.** 1988 Medicinal Chemistry, University of Connecticut

**Ph.D.** 1990, Medicinal Chemistry, University of Connecticut.

**B.Sc.** 2007 Theology School, University of Athens, Greece.

**M.Sc.** 2012 Social Theology School, University of Athens, Greece

**Doctoral Dissertation:** Study of the cannabinoid and anesthetic steroids with artificial and biological membranes. The dissertation can be found in the web site:  
<http://phdtheses.ekt.gr/eadd/handle/10442/12696>

## **EMPLOYMENT**

**1985-1987.** Teaching Assistant in School of Pharmacy for introductory and advanced level courses.

**1988-October 1990.** Research Assistant in School of Pharmacy.

**October 1990-June 1991.** Postdoctoral Fellow in School of Pharmacy.

**June 1991-September 2004.** Researcher director at Laboratory of Molecular Analysis (LMA) at the Institute of Organic and Pharmaceutical Chemistry (IOPC) of National Hellenic Research Foundation (NHRF). Use Molecular Modeling to study the conformational analysis of antihypertensive drugs, cannabinoids, steroids, and other bioactive molecules. Perform NMR experiments both in solution and in solid state to study the conformation analysis of biologically active molecules and drug:membranes interactions. Use DSC as a complementary tool to study the thermal changes in membrane bilayers after the incorporation of drugs. Use the modern high technology infrastructure of the institute to collaborate and solve some of the research

problems facing professors at Greek Universities. Such problems include structure determination of zeolites, inorganic complexes and soil materials.

**September 2004-beginning of January 2005.** Visiting associate professor at the University of Cyprus (Chemistry Department). Teaching of Organic Chemistry laboratory and Medicinal Chemistry.

**January 2005-2007** Director of Laboratory of Molecular Analysis (LMA) at IOPC.

**2007-** Elected since 2007 a President of the new established Center of Applied Research and Technology of Nicosia, Cyprus.

**January of 2007-May of 2007.** Visiting associate professor at the University of Cyprus (Chemistry Department). Teaching of Organic Chemistry laboratory and Medicinal Chemistry.

**September 2007-2012.** Associate Professor at the Chemistry Department of Athens

**June 2012-** Full Professor at the Chemistry Department of Athens

## AWARDS

1. Fellowship sponsored by Royal Society for two monthly stayment in Great Britain. During my residence at the University of York I was trained in Molecular Graphics at Prof. Rod Hubbard's laboratory.
2. Award for the 3<sup>rd</sup> best presented poster in the Third International Conference on Applications of Magnetic Resonance in Food Science, Nantes, September 16-18, 1996.
3. Award by the Academy of Athens (29 December 1998) for the best research activity in 1998 related to hypertension.
4. Award of a Fulbright Scholarship for the Summer of 1999.
5. Award for the 3<sup>rd</sup> best presented poster in the Conference of Patras entitled Medicinal Chemistry Design and Development of Drugs in Medicinal Chemistry (1-3, 2001).
6. Award for the 3<sup>rd</sup> best presented poster in the Conference of Patras entitled Medicinal Chemistry Design and Development of Drugs in Medicinal Chemistry (7-9, 2002).
7. In October of 2000, a committee consisting of Prof. E.C. Constable, Prof. G.W. Gray, Prof. M.W. Gray, Prof. P.A. Schubiger και Dr. N. Ragousi, characterized the research activity of Medicinal Chemistry as an excellent ("the work done in this group is excellent") and also the research referred to the adulteration of olive oil ("the

work of the group on virgin olive oil adulteration is worthy of note"). LMA is involved in both activities.

8. Reference of my research activity on peptidomimetism by the company Synergix Ltd in the software of «Molecular Conceptor». A chapter is written on the synthesis of Bioactive Molecules with G. Cohen of the same company and the product is now commercially available.
9. Scholarship by Royal society and COST D22 to perform binding experiments of antihypertensive molecules in AT<sub>1</sub> and AT<sub>2</sub> receptors as well as cell cultures.
10. Selected to teach at the University of Cyprus courses of Organic and Medicinal Chemistry.
11. The article "Conformation and Bioactivity, Design and Development of Novel Antihypertensive Molecules" is published in the Journal of "Current and Medicinal Chemistry (IF 4.483)" and was selected one of the best articles. This article after being modified was published in the "Frontiers in Medicinal Chemistry (volume 2)".
12. Invitation by Prof. A.M. Dopico to write a chapter in the book "Methods in Membrane Lipids" by Humana Press. The book has been circulated in 2007 and the chapter I have written appears with no 39 entitled "The Use of Differential Scanning Calorimetry to Study Drug-Membrane Interactions".
13. Honored as a second degree Universal Title in Theology (3.2.2008).
14. Selected as evaluator from the Scientific Committee of National Programs of Slovenia during the phases A and B (2007 until now).
15. In Wikipedia there is a web site referred to AMG-3 cannabinoid in which the following publications are mentioned: Mavromoustakos T, Theodoropoulou E, Zervou M, Kourouli T, Papahatjis D. ### **Brief Description of My Research Activities**

- Design of novel drugs against various diseases (i.e hypertension and inflammation)

To achieve this aim I use the following physical chemical methodologies:

- a. Solid State Nuclear Magnetic Resonance in order to study the dynamic changes it causes the antihypertensive drug in the lipid bilayers. In addition, the orientation of drugs in lipid bilayers is sought using deuterium NMR in collaboration with synthetic chemists who deuterate specific sites of drugs.
- b. High Resolution Nuclear Magnetic Resonance in duterated solvents or environments that simulate the active site of action.
- c. Conformational Analysis Using NMR ROE data in combination with computational analysis and molecular modeling to complement the experimental results.
- d. Differential Scanning Calorimetry to study the thermal changes that causes the presence of pharmaceutical compounds with model membranes.
- e. X-ray diffraction where the topography of drugs is sought in lipid bilayers. The X-ray diffraction experiments are run in Graz of Austria under the guidance of Prof. P. Laggner.

- f. Raman Spectroscopy to study the interactions of bioactive compounds with lipid bilayers. In particular, the *trans:gauche* ratio is estimated at the different mesomorphic states of lipid bilayers.
- g. 3D-QSAR studies. CoMFA and CoMSIA softwares are applied to reveal the stereoelectronic requirements for a drug to exert biological activity. 3D-QSAR studies is a valuable tool in the rational design.
- h. Simulation of NMR spectra in liquid and solid state with the collaboration of theoretical physical chemists.
- k. Docking studies of antihypertensive drugs with AT1 receptor.
- l. Searching for pharmacophore models in bioactive drug molecules.

- Authenticity aspects of beverages and foods

- a. Study of geographical origin and adulteration of virgin olive oil by other cheaper oils using high resolution  $^{13}\text{C}$ -NMR of olefinic region. In addition it is studied the adulteration of refined oil by refined hazelnut oil.
- b. Study of authenticity of Cypriot beverage zivania with the combination of different physical chemical methods in collaboration with the University of Cyprus ( $^1\text{H}$ -NMR and Raman Spectroscopies, ICP, Gas Chromatography, Refractometry, Statistical Analysis to facilitate the analysis of the output data etc).

## VISITS AND SPECIALISATION AFTER PH.D STUDIES

1. Specialisation in the Computational Analysis and Molecular Modeling at Prof. Rod Hubbard's laboratory (York University, Summer of 1992).
2. Invited visit to Prof. Peter's Lagger laboratory in order to perform small and wide angle x-ray diffraction experiments. The results from this visit are published in the *Biochim. Biophys. Acta* (Summer of 1996).
3. Modern Experimental techniques using NMR spectrometer of AMX 500 MHz and use of modern software to process the experimental data (University of Connecticut, Summer of 1999).
4. Biological experiments related to the binding of novel AT1 antagonists at AT1 and AT2 receptors as well as cell cultures (University of Leeds, Summer of 2004).
5. Visits in the Synchrotron facilities of Trieste, Italy to perform x-ray experiments (Summers 2007, 2009).
6. Visits of National Institute of Chemistry, Ljubljana, Slovenia (Summers of 2010 and 2012)
7. Visit of BMRZ in Frankfurt of Germany, October 2011 and scheduled for September 2013 for running solid state NMR experiments using Bruker 600 and 850 MHz spectrometers.

## FUNDING-WORKSHOPS

1. Coordinator of a funded research project by the European Community entitled "Molecular Characterization of Virgin Olive Oil" (148.000 ECU).

2. Participation in the funded research project by the European Community entitled Development and Assessment of Methods for the Detection of Adulteration of Olive Oil with Hazelnut Oil GROWTH (MEDEO 2001).
3. Co-organization of a workshop with Maria Zervou held in Athens on November 22, 1996 about the “Use of Isotope Analyses Applications in Food and Beverage Authentication. Detection of Adulteration.” In this workshop six speakers from France, German and England informed the audience about the new techniques in the analyses and detection of adulteration of foods and beverages. The audience consisted of seventy scientists from Greece and Cyprus working in Food and Beverage Industry, Govermental Organizations related to Food and Beverage Control and Greek Universities.
3. Participation as a co-ordinator or participant in 25 funded research projects by the General Secretary of Greece and European Community.
4. Organization of a partners participating in the MEDEO program which is referred to Development of Novel Methods to Detect Adulteration of Olive Oil by Hazelnut Oil (November 2001).
5. Participation in COST D22 and COST D26 programs. Acquire SMT mission.
6. Participation as a co-ordinator in a research project funded by the Institute of Promotion of Research in Cyprus entitled “New Approaches to face Psoriasis” and bilateral collaborations between Cyprus with Slovenia and Romania.
7. Co-organisation with S. Mavromoustakos in Cyprus a scientific conference to honour D. Poulter (3.11.2008).
10. September 17<sup>th</sup> 2010. Co-organisation with Schrodinger a workshop entitled “From Structural Biology to Drug Discovery”. In this workshop 85 researchers and professors from all over Greece participated actively.
11. Chairman with Prof. A. Tsotinis for organizing the international 29th Cyprus-Camerino-Noordwijkerhout Trends in Drug Research ”. conference at Limassol-Cyprus between 2-7 September 2012.
12. Member of the organizing committee of the 32<sup>nd</sup> European Conference of Peptide Chemistry ( September Athens 2-7, 2012).

### **Activity in Education**

1. Participation in different educational programs for teaching graduate students various aspects of Medicinal Chemistry and NMR spectroscopy (EPEAEK programs).
  - a. University of Patras, 1999 (Co-ordinator Prof. J. Matsoukas. Medicinal Chemistry, Drug Discovery and Design.)
  - b. University of Athens (Co-ordinator Prof. N. Xatdjichristidis, Polymer Science).
  - c. University of Ioannina, 2002-2003 (Co-ordinator Prof. N. Xatjihiliadis. Bioinorganic Chemistry).
  - d. University of Athens 2003-2005 (Co-ordinator Prof. G. Kokotos, Organic Synthesis and Application in the Industry).

## **Teaching at the University of Cyprus at Chemistry Department of undergraduate courses.**

- Laboratory of Organic Chemistry (553).
- Introduction in the Medicinal Chemistry (472)

## **Teaching at the University of Athens**

- Organic Chemistry (Undergraduate Course)
- NMR spectroscopy and Molecular Modeling (Graduate Course)
- Organic Chemistry for Physicists
- Bioorganic Chemistry (Organic Spectroscopy and Principles of Molecular Modeling)

## **Seminars to high school teachers**

- Seminars on the Modern Organic Chemistry and applications (May 1998).
- Guidelines on the philosophy of the written chemistry books for the high school students.
- Learning Chemdraw and Power Point (November 2008)

## **Seminar for the scientists working in the Cyprus industry for food and beverages.**

- Applications of Nuclear Magnetic Resonance as an aid to solve existing problems in industry.

## **Participation**

- Member of Research Committee for two Ph.D. students of Cyprus University and several students of Greek Universities. I am also participating as one of the majors advisors of the student S. Durdagi who will get Ph.D diploma from Frei University.
