

**Institute of Organic and Pharmaceutical Chemistry
National Hellenic Research Foundation
48 Vas. Constantinou Avenue, 11635 Athens, Greece**

POSTDOCTORAL FELLOWSHIP

Applications are invited for a research position in the context of the FP7-Regional Potential project “Advancement of Research Capability for the Development of New Functional Compounds” (ARCADE; www.arcade-iopc.eu) currently being implemented at the Institute of Organic and Pharmaceutical Chemistry (IOPC) of the National Hellenic Research Foundation, Athens, Greece (www.eie.gr).

The ARCADE project addresses specific issues focussing on the design and synthesis of functional compounds with potential applications in medicinal chemistry, catalysis and materials science.

A significant part of this project concerns a major upgrade of the Mass Spectrometry facility and we are therefore seeking a researcher with substantial experience in the applications of Mass Spectrometry to the study and characterisation of compounds and materials synthesised in the IOPC. Such compounds range from low molecular weight organic compounds to metal coordination compounds and dendrimers. As well as carrying out her/his own research project the researcher will also be expected to provide transfer of knowledge in mass spectrometry techniques to the other members of the IOPC.

The post will commence from November 2011 with a maximum duration of 15 months.

Gross salary will be in the region of 41000 € per annum.

Applications should be e-mailed to arcade_iopc@eie.gr and should include a full CV with list of publications and the names and addresses of two referees.

The deadline for applications is 7th October 2011.

NHRF is an equal opportunity employer and women scientists are encouraged to apply.
