LABORATORY OF ARTIFICIAL INTELLIGENCE & HISTORICAL RESEARCH

The purpose of the Laboratory of Artificial Intelligence and Historical Research is to bring together the expertise on the use of Artificial Intelligence tools in historical research which is already being produced within the Sectors of the IIE. The objectives of the Laboratory are:

- The exchange and dissemination of expertise regarding the uses of AI tools in historical research and education, especially through the study and processing of texts, sources, images, and artifacts.
- The creation of protocols and the formulation of good practices for training and for responsible use of AI tools in historical research and in the humanities in general.
- To work together with other IHR Laboratories that use digital tools, such as the Laboratory of Digital Historical Cartography and the Mount Athos Studies Laboratories.
- The dissemination of the Laboratory's results, the implementation of externally-funded research programs, and the networking with existing initiatives to upgrade the digital presence of the IIE/EIE.

Research Team

V. Antoniadis, Senior Researcher IHR/NHRF

Ch. Chrysanthopoulos, Scientific – Technical Personnel IHR/NHRF

M. Kalaitzi, Senior Researcher IHR/NHRF

D. Lappa, Associate Researcher IHR/NHRF

N. Livanos, Senior Researcher IHR/NHRF

G. Merianos, Senior Researcher IHR/NHRF

K. Tampakis, Senior Researcher IHR/NHRF

K. Tremountanis, Technical Support Specialist

Ch. Chrysanthopoulos, Scientific – Technical Personnel
