ACHILLES MSCA Doctoral Network: 16 Funded PhD Positions in Hemato-Oncology

About ACHILLES

ACHILLES (Advancing in the **CH**allenge of **I**mproving **L**ymphoma and **LE**ukemia **S**urvival) is a Marie Skłodowska-Curie Actions (MSCA) Doctoral Network funded by the European Commission under Horizon Europe (HORIZON-MSCA-2024-DN-01). The project trains **16 Doctoral Candidates** across **15 laboratories** in **12 European countries**, a new generation of scientists to develop innovative strategies for the treatment of haematological malignancies.

The Opportunity

16 three-year fellowships for Doctoral Candidates are starting in the 2026–2027 academic year and are distributed across 12 European countries, providing a unique opportunity for international and intersectoral experience.

DC10: AI-Driven Proteoform-Based Drug Repurposing for Targeted Cancer Therapies

The National Hellenic Research Foundation (NHRF) in Athens, Greece, invites applications for a **fully funded 3-year doctoral position** within the ACHILLES network. The DC10 project focuses on:

- Predicting drug repurposing outcomes through proteoform analysis and mechanistic insights
- Applying network-based approaches to map drug-target interactions and identify key molecular pathways
- Exploring molecular signatures to uncover mechanisms of treatment response and resistance, facilitating drug repurposing and identification of translational biomarkers

Supervisor: Dr T. Katsila, NHRF

Co-supervisors: Dr M. T. Matsoukas, UniWA; Dr V. G. de Yébenes, UCM

Eligibility

- Master's degree (or 300 ECTS equivalent)
- No doctoral degree at the time of recruitment
- Any nationality
- **Mobility rule:** must not have resided in Greece for >12 months in the 36 months prior to recruitment
- High proficiency in written and spoken English

Key Dates

Application deadline: 28 February 2026

Preselection results: 31 March 2026

Interviews: Second half of April 2026

Results communication: 15 May 2026

Fellowship start: August–November 2026
